

## Blank Plastic cards

---

All cards from Addressograph are manufactured from 100% plastic: we do not use laminated paper cores and our coloured cards are coloured all the way through.

Our cards are manufactured using the latest in laminating and cutting technology, and with the exception of economy grade cards, every single card goes through an electronic testing process.

### Addressograph Premium

These cards are all held in stock for immediate delivery. If you don't see exactly the combination of colour and features that you need, just give us a call, and we can run a special order for you.

Material: 100% PVC

Thickness: 760 microns

101-003-408	White self-adhesive PVC	100
	Key tag cards: CR80, scored 3 tags/card	

## Economy Grade

If you're running a high-volume print application, you'll be checking every single card after printing, so why pay extra for the card manufacturer to do exactly the same to the blank cards? Addressograph economy grade cards are manufactured to exactly the same high specification as our standard cards, but undergo batch testing instead of 100% inspection. If you have a built-in reject tolerance, you'll find our economy grade cards offer a considerable cost-saving.

Code	Colour	Packaging
101-888-010	White	500

## Packaging

Our cards are shrink-wrapped in quantities as indicated, and packed in unbranded white boxes.
